

## Supernova

This chip carving pattern reminds an exploding star. That is the reason for the name of this pattern: Supernova

Supernova chip carving pattern is an ultimate project for new chip carvers. To make it an easier project I placed the chips apart, so no two chips share the same edge. That makes the project forgiving to some common mistakes that lead to broken or uneven ridges such as excessive undercutting and curved cuts. Both coasters consist of 108 three corner chips.
